Applying the Right Technology for Group Meetings

Network Services

HSIA peace of mind

Your meeting planner clients have enough stress during their events without having to worry about High Speed Internet Access (HSIA) network issues. With PSAV® Presentation Services, they won't have to.

On-site single contact

PSAV owns, manages and sells your HSIA network services. This gives you the convenience of outsourcing all of your clients' technology needs from a single on-site provider. PSAV assists your clients so there's never a need to call an outside network service provider.

Up sell opportunities mean greater revenue

Because our event technology experts have a more focused, proactive way of selling Network Services, meeting room revenues are maximized. We offer customized premium service options as part of our proven, on-site sales process. Bandwidth management, for example, allows up sell opportunities to groups with mission critical applications.

The best equipment — Capital preservation

With PSAV handling your network, you get leading edge technology from Cisco Systems Inc. By leveraging our partnership, you get carrier-grade equipment — so you experience far fewer networking issues. And our investment allows you to preserve capital funds.

PSAV Client Network Services include:

- HSIA in meeting rooms
- HSIA in guest rooms
- Customized network options
 - Bandwidth management
 - Virtual Private Networks (VPN)
 - Networked conferences
 - Wireless networks
- Internet kiosks
- Cyber cafes
- Wireless/wired solutions

Computer Rentals

Equipment and assistance

PSAV provides computers, networking and peripherals. A PSAV professional is on-site for assistance.

Digital Content Management

Manage multiple presenters

When PSAV is servicing your network, it's easy to meet emerging technology demands of leading associations and corporations. We enhance meetings with:

- PSAV's Content Management System — the "nerve center" that allows multiple presenters to:
 - Collect and securely store material
 - Review and revise presentations, 24/7
 - Run e-Posters — a revolutionary, all-digital poster creation and viewing system that brings technical poster sessions into the 21st century
- Webcasting and Digital Capture — repurposes key meeting content so the message lives beyond the meeting

➤ **Client Network Services from PSAV. The best technology for your customers. Better revenues for you.**
